# Wine 0% Alcohol

Vini 0% Alcol  
Weine 0% Alko

The main process consists in dealcoholization which allows to reduce the alcohol value in the wine until reaching a legal value that distinguishes a non-alcoholic drink from an alcoholic one.

Through this process our drinks are 0.0% vol.

The alcohol elimination process does not involve the use of chemical substances but rather simple water.

The process is carried out by a "membrane dealcoholizer", a new technology machine composed of a control panel, membranes, pre-filters and circuits for the entry/exit of wine and water.

The wine and the water flow in the same direction through their separated circuits until reaching a membrane which keeps them separated through a physical process called "direct osmosis" where the alcohol is released from the wine to the water..

# La Nostra Filosofia

## -Our Philosophy-

Ama e servi tutta l'umanità, assisti tutti, sii originale, sii creativo, sii te stesso, fai che la tua vita sia quella di un' "A-Rosa" silente e pur essa parla il linguaggio della fragranza.

-Shri Babaji-

Love and serve all humanity, assist everyone, be cheerful  
be polite.

Be a dynamo of unstoppable happiness.

Let your life be that of A-Rosa: while silent it speaks the  
language of fragrance.

-Shri Babaji Haidakhan-
